

webBXT

webBXT gives exclusive access to 4D Brachytherapy which offers significant patient and practice benefits.

Unique e-commerce platform providing on-line ordering, convenient data management and automated seed calculation and order generation

An intuitive and easy-to-use interface, webBXT offers BXTAccelyon customers the opportunity to transform practice efficiencies and optimise resources.

A new level of convenience

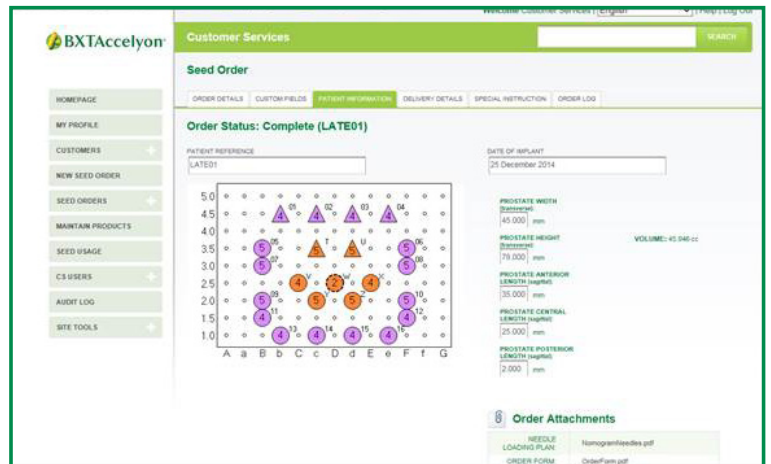

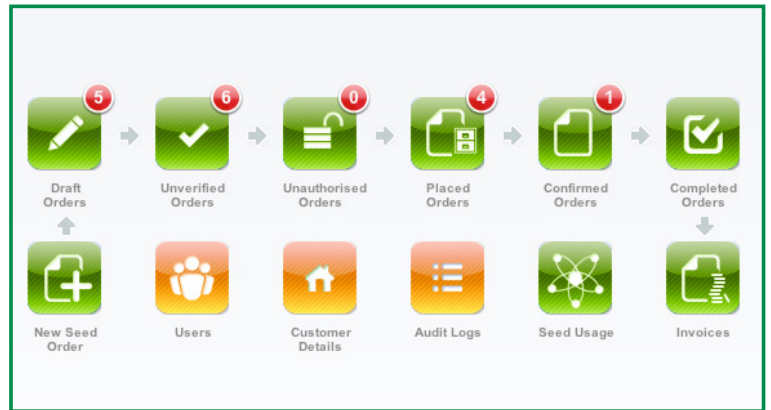

- Remote log-in capability
- Access to 4D Brachytherapy and unique on-line order calculation for pre-loaded kits in a one-step procedure

Reduce paperwork and improve traceability

- On-line order forms, confirmations and invoices
- Email updates on order tracking and status
- Streamlined authorisation processes and audit logs
- Automated seed usage reporting
- Complete document storage

Confidence for you and your patients

- Robustly tested platform developed to e-banking standards
- Complete anonymity of all patient data
- Capacity to manage suggested prescription
- Order fulfilment with BXTAccelyon products – selected and specified to the highest standards

Committed to the *future* of brachytherapy

webBXT

Backed by more than 15 years' research and powered by an exclusive algorithm developed with data from over 1000 procedures, 4D Brachytherapy offers significant efficiencies for your practice while placing it at the forefront of patient-centric and effective prostate cancer treatment delivery.

The confidence of stranded seeds in a real-time, one-step procedure which enhances the already proven benefit of two-stage stranded techniques: ^{1,2,3}

For the patient:

- Improved dosimetric outcomes⁴
- Lower side-effect profile, especially in terms of erectile dysfunction (ED)⁵
- Reduced risk of procedure or anaesthesia-related complications
- Reduced inconvenience and anxiety

For the practice:

- Reduced operating room and theatre resource time
- Potential to increase number of patients treated and reduce waiting lists while optimising patient care
