

# IsoLoader<sup>®</sup>

Rapid real-time preparation  
of customised securely  
stranded seeds

**IsoLoader<sup>®</sup> is a flexible, quick and convenient intraoperative solution to creating high-quality strands within the OR**

- Simple-to-use, quality-engineered device enables customised strands to be built in real time within a sterile environment
- Unique technology encapsulates the seeds securely within the strand to prevent separation after implantation
- Strands can be loaded directly into pre-plugged and plug-free needles, or into transfer tubes and after-loaded
- Standard and variable load seed/spacer combinations possible, ideal for central needle loads

IsoLoader<sup>®</sup> is ideally suited for  
4D Brachytherapy procedures

 **BXTAccelyon<sup>®</sup>**

Committed to the *future*  
of brachytherapy
